EDUCATION

Eötvös Loránd University — Budapest, Hungary
BSc in Computer Science — *Feb 2023 – Jul 2026*
- GPA: 4.2 / 5.0
- Key Courses: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Web Development, Database Systems, Artificial Intelligence and Machine Learning

EXPERIENCE

Web Development Intern | WaseerHost — Kamalia, Pakistan
WaseerHost — *Sep 2020 – Sep 2022*
- Built SEO-optimized, responsive websites using HTML, CSS, JS, and Elementor Pro to enhance client reach.
- Improved site performance and uptime through asynchronous asset loading and plugin debugging.

Student Mentor | HÖOK — Budapest, Hungary
HÖOK – National Union of Students in Hungary — *Jul 2023 – Present*
- Guided incoming Stipendium Hungaricum scholars through academic, administrative, and cultural onboarding.
- Assisted international students with resolving official procedures, university integration, and day-to-day challenges.

PROJECTS

Learning Management System (LMS) | GitHub — 2024
- Built a Laravel + React LMS platform with role-based access, Dockerized backend, and course/user management with clean API integration and SQLite migrations.

Digital Note Taker | GitHub • Live Demo — 2024
- Created a full-stack React + Flask app with tagging, dark/light themes, MongoDB storage, and deployed using GitHub Pages and Render for complete note management.

Emotion-Based Movie Recommender | GitHub • Live Demo — 2024
- Built a Flask app that analyzes emotional tone using VADER/TextBlob and suggests categorized movies using TMDb API with real-time data rendering.

Behoop – Business Site Builder | GitHub • Live Demo — 2024
- Designed a responsive React site template for businesses using Tailwind, Framer Motion, and React Helmet with performance-focused lazy loading and SEO.

IkarRental – Car Booking System | GitHub — 2024
- Developed a PHP-based rental system with booking calendar, AJAX modals, user/admin dashboards, and file-based CRUD operations for car and booking management.

TECHNICAL SKILLS
